

MT MARION LITHIUM CRUSHING FACILITY UPGRADE

CLIENT Mineral Resources Ltd

LOCATION Yilgarn Region, Western Australia

Rising to the challenge

- Our team were proactive in our design approach, suggesting alternative solutions to assist the project and relieve pressure from MRL's design team.
- Mechwest assisted the design team by developing the models to comply with MRL's standards.
- Mechwest were able to incorporate design changes during the detailing process while still meeting delivery dates.
- To condense the time frame Mechwest coordinated directly with the Designer and effectively scaled our resources to boost production and meet time frames.
- A multi-discipline approach was adopted to assist our client.
- As this project was an upgrade, we utilised custom tools and our extensive industry experience to interface against.
